## Privacy

### Mail Content

Allow remote content in messages

[Exceptions...](#)

[Learn more about the privacy issues of remote content](#)

### Web Content

Remember websites and links I've visited

[Exceptions...](#)

Accept cookies from sites

Accept third-party cookies

Keep cookies until

[Show Cookies...](#)

Send websites a "Do not track" signal that you don't want to be tracked [Learn more](#)

## Passwords

Thunderbird can remember passwords for all of your accounts.

[Saved Passwords...](#)

A Master Password protects all your passwords, but you must enter it once per session.

Use a master password

[Change Master Password](#)

## Junk

Set your default mail settings. Account specific junk mail settings can be configured in [Account Settings](#).

When I mark messages as junk

Move them to the account's "Junk" folder

Delete them

Mark messages determined to be Junk as read

Enable adaptive junk filter logging

[Show log](#)

[Reset Training Data](#)

## Data Collection and Use

Shares performance, usage, hardware and customization data about your e-mail client with Mozilla to help us make Thunderbird better. [Privacy Notice](#)

Enable Telemetry [Learn more](#)

### Crash Reporter

Thunderbird submits crash reports to help Mozilla make your e-mail client more stable and secure.

Enable Crash Reporter [Learn more](#)

## Security

### Scam Detection

Thunderbird can analyze messages for suspected email scams by looking for common scam techniques.

Tell me if the message I'm reading is a suspected email scam

### Antivirus

Thunderbird can make it easy for antivirus software to analyze incoming mail messages for viruses before they are stored locally.

Allow antivirus clients to quarantine individual incoming messages

### Certificates

When a server requests your personal certificate

Select one automatically

Ask every time

Query OCSP responder servers to confirm the current validity of certificates

[Manage Certificates](#)
